ENGINEERING GEOLOGY

www.elsevier.com/locate/enggeo

Subject Index Volume 62

3D geologic structure
Geologic structures related to New Madrid earthquakes near Memphis, Tennessee, based on gravity and magnetic interpretations 105

Amplification
Non-linear one-dimensional seismic ground motion propagation in the Mississippi embayment 185
Aquifer characterization
Detection and hydrologic modeling of aquifers in unconsolidated alluvial plains through combination of borehole data sets: a case study of the Arao area, Southwest Japan 301

Case study
Groundwater resources evaluation case study via discrete fracture flow modeling 267
Catalogs
Central US earthquake catalog for hazard maps of Memphis, Tennessee 19
Central US
Soil amplification maps for estimating earthquake ground motions in the Central US 7
Clayey sand
The combined effect of clay and moisture content on the behavior of remolded unsaturated soils 319
Cone penetrometers
Geotechnical site characterization in the greater Memphis area using cone penetration tests 169
Confining pressure
Non-linear one-dimensional seismic ground motion propagation in the Mississippi embayment 185

Deep deposit
Non-linear one-dimensional seismic ground motion propagation in the Mississippi embayment 185
Dikes
Liquefaction susceptibility mapping in the city of Memphis and Shelby County, Tennessee 207
Downhole geophysics
Geotechnical site characterization in the greater Memphis area using cone penetration tests 169

Earthquake hazards
Known and suggested quaternary faulting in the midcontinent United States 51
Earthquake
Ground zoning against seismic hazard in Athens, Greece 343
Introduction to special issue titled earthquake hazard evaluation in the Central United States 1
Soil amplification maps for estimating earthquake ground motions in the Central US 7
Earthquakes
Central US earthquake catalog for hazard maps of Memphis, Tennessee 19
Engineering geological mapping
Ground zoning against seismic hazard in Athens, Greece 343
Environmental factors
The combined effect of clay and moisture content on the behavior of remolded unsaturated soils 319

Facility structural models
Seismic response interaction between subsurface geology and selected facilities at the University of Mississippi 223
Fault-propagation fold
Geometry, numerical models and revised slip rate for the Reelfoot fault and trishear fault-propagation fold, New Madrid seismic zone 31
Faulting
Known and suggested quaternary faulting in the midcontinent United States 51
Fractures
Groundwater resources evaluation case study via discrete fracture flow modeling 267
Frequency content
Non-linear one-dimensional seismic ground motion propagation in the Mississippi embayment 185

Geologic faults
Known and suggested quaternary faulting in the midcontinent United States 51
Ground motion amplification

Regional variations in near surface shear wave velocity in the Greater Memphis area 137
Groundwater flow
Detection and hydrologic modeling of aquifers in unconsolidated alluvial plains through combination of borehole data sets: a case study of the Arao area, Southwest Japan 301

Hazard mapping
Geotechnical site characterization in the greater Memphis area using cone penetration tests 169
Hazard
Central US earthquake catalog for hazard maps of Memphis, Tennessee 19
Hydrogeology
Groundwater resources evaluation case study via discrete fracture flow modeling 267

In-situ tests
Geotechnical site characterization in the greater Memphis area using cone penetration tests 169
Intraplate earthquakes
Geologic structures related to New Madrid earthquakes near Memphis, Tennessee, based on gravity and magnetic interpretations 105

Knowledge-based variability
A seismic hazard uncertainty analysis for the New Madrid seismic zone 251

Liquefaction susceptibility
Introduction to special issue titled earthquake hazard evaluation in the Central United States 1
Liquefaction susceptibility mapping in the city of Memphis and Shelby County, Tennessee 207
Liquefaction
Geotechnical site characterization in the greater Memphis area using cone penetration tests 169

Mapping
Soil amplification maps for estimating earthquake ground motions in the Central US 7
Memphis, Tennessee
Central US earthquake catalog for hazard maps of Memphis, Tennessee 19
Microzonation
Ground zoning against seismic hazard in Athens, Greece 343
Mini-Sosie
Seismic-reflection imaging of Tertiary faulting and related post-Eocene deformation 20 km north of Memphis, Tennessee 79
Mississippi
Seismic-reflection imaging of Tertiary faulting and related post-Eocene deformation 20 km north of Memphis, Tennessee 79
Monte Carlo sampling
A seismic hazard uncertainty analysis for the New Madrid seismic zone 251

NEHRP
Regional variations in near surface shear wave velocity in the Greater Memphis area 137
New Madrid Seismic Zone (NMSZ)
Regional variations in near surface shear wave velocity in the Greater Memphis area 137
New Madrid seismic zone
A seismic hazard uncertainty analysis for the New Madrid seismic zone 251
Non-linear
Non-linear one-dimensional seismic ground motion propagation in the Mississippi embayment 185
Nonlinear finite element simulations
Seismic response interaction between subsurface geology and selected facilities at the University of Mississippi 223
Numerical modeling
Groundwater resources evaluation case study via discrete fracture flow modeling 267

Paleoseismology
Known and suggested quaternary faulting in the midcontinent United States 51
Paleozoic carbonates
Seismic-reflection imaging of Tertiary faulting and related post-Eocene deformation 20 km north of Memphis, Tennessee 79
Parameters and properties
A new rock mass classification for Coal Measures Rocks 293
Penetration tests
Geotechnical site characterization in the greater Memphis area using cone penetration tests 169
Potential-field data
Geologic structures related to New Madrid earthquakes near Memphis, Tennessee, based on gravity and magnetic interpretations 105
Pumping tests
Groundwater resources evaluation case study via discrete fracture flow modeling 267

Quarternary loess
Seismic-reflection imaging of Tertiary faulting and related post-Eocene deformation 20 km north of Memphis, Tennessee 79
Quaternary
Known and suggested quaternary faulting in the

midcontinent United States 51

Resistivity
Detection and hydrologic modeling of aquifers in unconsolidated alluvial plains through combination of borehole data sets: a case study of the Arao area, Southwest Japan 301
River floodplain
Seismic-reflection imaging of Tertiary faulting and related post-Eocene deformation 20 km north of Memphis, Tennessee 79
Rock mass classification
A new rock mass classification for Coal Measures Rocks 293

Sand and gravel layer
Detection and hydrologic modeling of aquifers in unconsolidated alluvial plains through combination of borehole data sets: a case study of the Arao area, Southwest Japan 301
Screen
Detection and hydrologic modeling of aquifers in unconsolidated alluvial plains through combination of borehole data sets: a case study of the Arao area, Southwest Japan 301
Seismic hazard mapping project
Introduction to special issue titled earthquake hazard evaluation in the Central United States 1
Seismic hazard
Ground zoning against seismic hazard in Athens, Greece 343
Seismic response
Seismic response interaction between subsurface geology and selected facilities at the University of Mississippi 223
Seismic risk
Central US earthquake catalog for hazard maps of Memphis, Tennessee 19
Seismic-reflection
Seismic-reflection imaging of Tertiary faulting and related post-Eocene deformation 20 km north of Memphis, Tennessee 79
Seismicity
NEHRP soil classifications for estimating site-dependent seismic coefficients in the Upper Mississippi Embayment 123
Shear wave velocity
Geotechnical site characterization in the greater Memphis area using cone penetration tests 169
NEHRP soil classifications for estimating site-dependent seismic coefficients in the Upper Mississippi Embayment 123
Regional variations in near surface shear wave velocity in the Greater Memphis area 137
Shear wave
NEHRP soil classifications for estimating site-dependent seismic coefficients in the Upper Mississippi Embayment 123
Shelby County
Liquefaction susceptibility mapping in the city of Memphis and Shelby County, Tennessee 207
Site response
Non-linear one-dimensional seismic ground motion propagation in the Mississippi embayment 185
Slip rate
Geometry, numerical models and revised slip rate for the Reelfoot fault and trishear fault-propagation fold, New Madrid seismic zone 31
Soil amplification
Soil amplification maps for estimating earthquake ground motions in the Central US 7
Soil behavior
The combined effect of clay and moisture content on the behavior of remolded unsaturated soils 319
Strength and behaviour of rock
A new rock mass classification for Coal Measures Rocks 293
Subsurface geology
Seismic response interaction between subsurface geology and selected facilities at the University of Mississippi 223
Swelling potential
The combined effect of clay and moisture content on the behavior of remolded unsaturated soils 319

Three-dimensional interpolation
Detection and hydrologic modeling of aquifers in unconsolidated alluvial plains through combination of borehole data sets: a case study of the Arao area, Southwest Japan 301
Thrust fault geometry
Geometry, numerical models and revised slip rate for the Reelfoot fault and trishear fault-propagation fold, New Madrid seismic zone 31

Unsaturated soils
The combined effect of clay and moisture content on the behavior of remolded unsaturated soils 319

Vibroseis
Seismic-reflection imaging of Tertiary faulting and related post-Eocene deformation 20 km north of Memphis, Tennessee 79
